DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 26 June 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent No. 7,337,363 B2 has been reviewed and is accepted. The terminal disclaimer has been recorded.

REASONS FOR ALLOWANCE

2. Claims 1, 2, 4-14, 16-18, and 20-25 will be allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not provide for nor suggests providing for as follows:

Systems and methods for monitoring performance of an application domain, where the application domain is defined by a plurality of computing resources located in one or more grids of a grid computing environment. Data on the application domain is collected by recording and subsequently analyzing the actions of software objects as they move and perform actions in the different computing resources defining the application domain;

A software object operating in a computing resource located within a grid of a grid of a computer environment can be identified. A ghost software object located in the same grid can then be associated to the host software object. The associated ghost software object can then replicate and record the actions of the host software object;

As the host software object is transferred from one grid to another grid, the ghost software object is also transferred to the same grid as the host, allowing the host

software object and its associated ghost software object to always be located in the same grid. This allows the ghost software object to continue replicating and recording the actions of the host software object as it traverses the grids without requiring each and every grid to be monitored in order to determine actions of the host software object; and

The ghost software object does not monitor the output of the host but essentially operates independently of the host by replicating each and every action of the host to generate the output of the host.

The closest prior art (Gruyer et al. Patent Pub. No. 2002/0112048 A1) discloses a system and method for using an agent downloaded to a user device to record and transmit web site usage information to one or more servers.

For these reasons, in conjunction with the other limitations of the independent claim, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
